Special Pure Rice Sake ‘GOKUIN-RYOMA’

"GOKUIN" means "incuse" in English. It is named by our hope, that we keep remember Ryoma's spirits and keep tough and positive mind like Ryoma always. As if We incuse to something...

Masuda Tokubee imagined Ryoma and He made "GOKUIN-RYOMA". "GOKUIN-RYOMA" is made by only organic pure rice and malted Rice. Becourse "Ryoma" had being said to very pure and honesty person. So additives, brewing alcohol and other anything are not contain in GOKUIN-RYOMA. Originally we enjoy rice taste and quality in SAKE, it is like enjoy grape taste and quality in Wine. So too much rice polishing is made sake of less taste of rice. This is so further from original Japanese sake. We are confident about that "GOKUIN-RYOMA" is true Japanese Sake.

Edo Kiriko(fact glass)carved the crest of Ryoma Sakamoto's family

These glasses are all manufactured by hand carving and polishing by traditional craftsman of Edo Kiriko (facet glass), Mr. Kiyohide. And these are specially designed by his own for tokubetsu junmaishu 'RYOMA', and decorated Sakamoto Family Crest, 'Crest of bellflowers at the intersections', There are three colors; black, blue and red. He carves patterns on the glass material with a diamond-cutter. Especially, when he carves black ones, it takes three times as long as usual and needs more effort. The reason is why he can't see the carving part since that is black color, so he has to trust only his own intuition and cultivated fingertip technique. There are very few craftsmen who are able to carve Black Kirikos, and then the amount of goods is severely limited. That's why Black Kirikos are valuable. Also, all of lineups have a small hanging scroll written in handwriting by Noboru Sakamoto, the ninth head of Sakamoto Family, six patterns of the great words left by Ryoma Sakamoto. Both of the Edo kirikos with Sakamoto Family Crest and the small hanging scrolls written in handwriting by Noboru Sakamoto, the ninth head of Sakamoto Family, are not for sale.
